### **DETAILED ACTION**

1. The Amendment filed on March 19, 2002 has been entered.
2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on March 19, 2002 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

### ***Claim Objections***

3. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 4 been renumbered as claim 5.

It is noted that in the current amendment includes the correct instructions for replacement of the claim. However, the new claim does not include a claim number. Thus, in the future, Applicant is advised to include the correct claim number for any subsequent amended or new claims.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3724

5. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- i. The following phrases lack clear antecedent basis: (claim 5, l. 8) “the bottom rim”.
- ii. In claim 5, l. 10, the term “it” is vague and indefinite. What is “it” referring to? If the term is referring to the “edge”, then the term should read -- the cutting and chopping edge --.

### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. As best understood, claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Seib et al.

Seib et al discloses a stoma flange cutter comprising all the elements claimed including, inter alia, a circular top (e.g. 38, 40); a circular bottom (e.g. at 42); a cylindrical body wall (36); a permanently affixed cap (18); cutting and chopping means (42); and a removable protective cover (20).

Regarding the work being “cabbage”, this has not been given significant patentable weight, since it has been held that a recitation with respect to the manner in

Art Unit: 3724

which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Regarding the manner in which the cutting and chopping means is formed, this has not been given significant patentable weight, since in an apparatus invention, how a structure is formed is not germane to the structure itself.

### ***Response to Arguments***

8. Applicant's arguments filed March 19, 2002 have been fully considered but they are not persuasive.

In response to Applicant's basic argument that Seib et al does not anticipate the claimed invention because Seib et al does not cut cabbage,<sup>1</sup> this argument is respectfully traversed. Under 35 USC § 102, the workpiece is given no patentable weight. *Ex parte Masham*, 2 USPQ2d 1647 (1987). Thus, it is irrelevant whether the prior art cuts cabbage or not, since the structural limitations of the claimed invention is met by the teachings of Seib et al.

### ***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3724

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
